SDHC

http://en.wikipedia.org/wiki/Secure_Digital#SDHC

FAT32 - 4kb Clusters

http://en.wikipedia.org/wiki/File_Allocation_Table

8.3 Filename

http://en.wikipedia.org/wiki/8.3_filename

Items needed

1. A micro SD card^{*}
2. A micro SD card reader

*Notes:-

micro SD card must be SDHC type.

micro SD card capacity range 4 GB to 32 GB.

micro SD card speed grade doesn't matter.

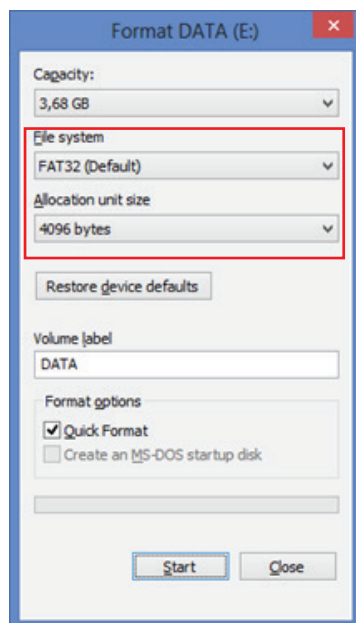

Preparing SD card

Step 1 :

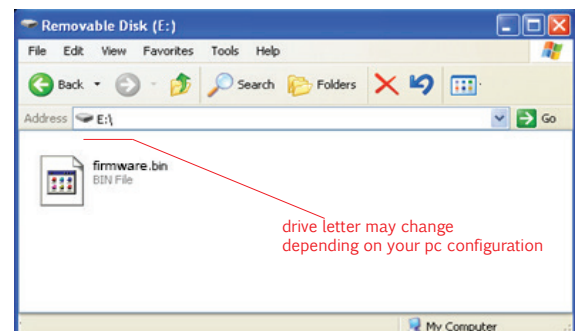

Format the SD card to FAT32 with cluster size of 4096 bytes.

(in windows right click the drive letter and choose format)

Step 2 :

Copy the firmware image file to the root of the SD card.
(do not place it in a folder!)

The firmware is .bin file and must follow 8.3 naming convention.

Upgrade process

Step 1

Insert SD card in the CONBOX MkII

Step 2

Connect to mains.

After completing step 1 and step 2; follow below steps to start upgrading firmware.

power up

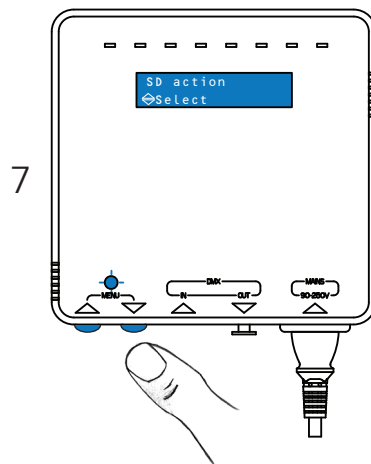

press \triangle ∇ together to enter menu

press ∇ two times to choose Device Function

press \triangle ∇ together to select Device Function

press ∇ three times to choose SD Action

press \triangle ∇ together to select SD Action

press \triangle ∇ together to upgrade

If you copied more than one firmware image file, then use \triangle ∇ button to make suitable selection.

the upgrade can take up to 15 to 30 seconds.

Dont power off during this operation!

end of upgrade display will show upgraded version

Please feel free to contact us if you encounter any problems.
